

It is imperative that XM Radio be allowed to continue offering Instant Traffic & Weather, I am paying for a service and should be able to recieve what I pay for. When listening to AM or FM radio I cannot get instant updates but have to listen to ten minutes of nonsense radio and commercials, then at a slotted time am I able to receive a partial 30 or 60 second update as to weather or road conditions. XM offers continual updates and give me the information I need. I drive an average of over three hundred miles a day as a sales rep and XM is the only station to listen to uninterrupted.
